

VI- Dilapidated Residential Structures. A group of sub-standard houses in the back of Winn-Dixie store along the west side of Bridge Street should be cleared. In close proximity to the automobile oriented retail establishments, this narrow strip of land is not best suited for residential reuse. The best use of this tract of land probably lies in secondary retail, similar to the rest of the block.

VII- Tobacco Warehouse and Adjacent Structures. One more
&
VIII tobacco warehouse is to be found in close proximity of downtown core area. As with the others within the central district, this one is recommended to be re-located. The farm supply store located in Area VII is ideally suited in an outlying locale, with greater accessibility and cheaper land cost. In some future date, this store may hopefully be relocated. The vacated land is tentatively proposed as a supplement parking area for the downtown primary retail core immediately across the street.
